ENTERPRISE HRMS DOCUMENTATION

Brightcone HRMS — Master Presentation & Technical Guide

End-to-End System Walkthrough, Architecture, Workflows & Database Reference

Date: October 28, 2026 **Frontend:** React 18 · Vite · TypeScript **Backend:** Rust (Loco.rs / Axum) · SeaORM

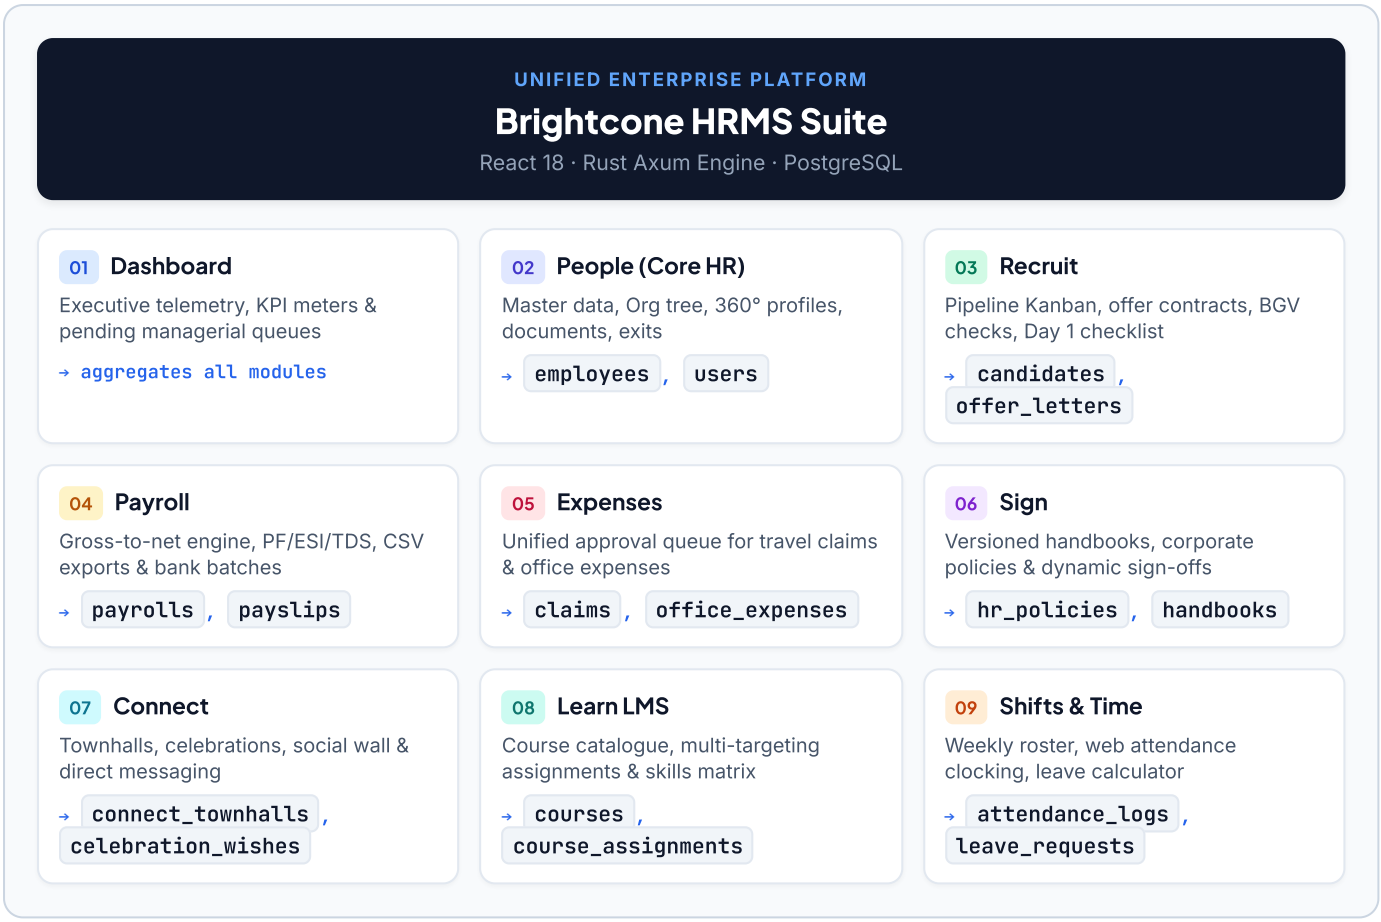

Database: PostgreSQL (42 Entities)

Brightcone HRMS — Master Presentation & Technical Reference Guide

Prepared for: Executive & Client System Presentation
System Architecture: Unified Multi-Module HRMS Platform
Frontend: React 18, TypeScript, Tailwind CSS, Vite (`http://localhost:3000`)
Backend: Rust (Loco.rs / Axum), SeaORM Entity-First Engine (`http://127.0.0.1:5155`)
Database: PostgreSQL (42 domain entities synced automatically on boot via advisory locking)

1. High-Level System Architecture & Navigation Overview

The Brightcone HRMS is an enterprise-grade Human Resource Management and Operations Suite designed with an **entity-first architecture**. Every module communicates with central live records (principally `employees` , `users` , and `audit_logs`), eliminating isolated data silos.

2. Module-by-Module Walkthrough (Pin-to-Pin)

MODULE 1: SUITE EXECUTIVE DASHBOARD

- **Routes:** `/`, `/dashboard`, `/suite`
- **What it Does:**
- Executive cockpit providing real-time operational telemetry across all sub-systems.
- Summarizes active headcount (FTEs, contractors, probationers), monthly payroll disbursement totals, open recruitment requisitions, pending expense claims, and time-off requests.
- **Sections on the Page:**
- **Top KPI Metrics Strip:** Live headcount count, active monthly payroll run status, attendance check-in % for the day, and pending action items.
- **Pending Actions / Approvals Queue:** Quick review cards for leaves, expenses, and candidate offer approvals.
- **Module Quick Launchers:** One-click shortcuts directly into People, Payroll, Recruit, Sign, Connect, and Learn.
- **Announcements & Celebrations Feed:** Live company highlights, upcoming work anniversaries, and today's birthdays.
- **Data Flow & Routing:** Queries `/api/v1/dashboard/summary` which aggregates counts from SeaORM entities (`employees`, `claims`, `candidates`, `attendance_logs`).

MODULE 2: PEOPLE (CORE HR & EMPLOYEE LIFECYCLE)

2.1 Employee Master Data

- **Route:** `/people` (Nav: People > Employee Master Data)
- **What it Does:** Centralized single-source-of-truth directory of all enterprise personnel.
- **Key Features & Sections:**
- **Data Table / Grid:** Real-time searchable and filterable list of all employees (by Department, Status: Active/Probation/Notice, Location).
- **Add Employee Modal:** Form to register a new hire (Full Name, Employee Code, Email, Job Title, Department, Manager, Joining Date).
- **Bulk Import / Export:** One-click CSV export and batch CSV import directly synchronized to PostgreSQL.
- **Row Action Drawer:** Direct shortcut to view deep profile, edit details, or change lifecycle status.
- **Database Table:** `employees`
- *Key Fields:* `id`, `employee_code`, `full_name`, `email`, `department`, `job_title`, `status`, `joined_date`, `avatar_url`, `manager_code`, `location`, `phone`.

2.2 Org Structure

- **Route:** `/people/org-chart`
- **What it Does:** Visual interactive organizational hierarchy tree rendering the reporting chain from the Founder & CEO (Naresh Vemparala, L9) down through Directors, Leads, and Individual Contributors.
- **Sections:** Departmental selector (Engineering, Product, People, Finance), Zoom/Pan canvas, and individual employee node cards with direct reports count.

2.3 Onboarding / New Joiners

- **Route:** `/people/onboarding`
- **What it Does:** Tracks new joiners in their first 90 days. Monitors documentation completion, hardware/IT provisioning status, buddy assignment, and Day 1 orientation status.
- **Sections:** Stage pipeline (Pre-arrival, Day 1, Week 1, Month 1), task progress bar, and document collection checklist.

2.4 Employee Profiles

- **Route:** `/people/profile` or `/people/profiles/:id`
- **What it Does:** Comprehensive 360-degree digital personnel record.
- **Sections:**
- **Header Banner:** Name, Employee Code, Title, Department, Verified Status Badge, Direct Manager.
- **Contact & Residential:** Personal email, phone number, residential address.
- **Emergency Contacts:** Primary contact name, relationship, and emergency phone.
- **Statutory & Identity (Masked):** PAN, Aadhaar, Provident Fund (PF) UAN number.
- **Employment Timeline:** Date joined, promotions, department transfers, and active compensation band.
- **Documents Vault:** View and preview employment agreements, ID proofs, and certifications.

2.5 Employee Documents

- **Route:** `/people/documents`
- **What it Does:** Secure document repository for official personnel documents.
- **Sections:** Category folders (Identity & Address, Educational Certificates, Previous Employment, Tax Declarations), file drag-and-drop upload zone, preview modal, and verified badge.
- **Database Table:** `documents` (`id`, `employee_id`, `doc_type`, `file_name`, `file_url`, `uploaded_at`).

2.6 Probation Tracking

- **Route:** `/people/probation`
- **What it Does:** Manages probationary employees (standard 90 or 180-day probation).
- **How to Add / How it Works:** Employees set to `status = 'Probation'` in Employee Master Data automatically appear here. Managers evaluate performance against 30/60/90-day milestones and choose to **Confirm Employment**, **Extend Probation**, or initiate separation.
- **Database Field:** `employees.probation_status` (`In Review`, `Confirmed`, `Extended`).

2.7 Employee Performance Reviews & Appraisal Tracker

- **Routes:** `/people/performance`, `/people/appraisals`
- **What it Does:**
- **Performance Reviews:** Quarterly appraisal cycles, OKR/goal tracking, 360-degree feedback, and manager evaluation forms.
- **Appraisal Tracker:** Compensation calibration matrix where leadership reviews performance rating distributions (Bell Curve), proposed hike percentages, and merit increase budgets.
- **Database Tables:** `performance_reviews`, `review_cycles`, `employee_goals`.

2.8 Employee Exit Management

- **Route:** `/people/exit`
- **What it Does:** End-to-end offboarding and separation governance.
- **Sections:**
- Resignation initiation (reason, proposed last working day, notice period tracker).
- Multi-department clearance checklist (IT asset return, Finance expense settlement, Admin access card deactivation).
- Final settlement status (Full & Final / F&F computation).
- **Database Table:** `employee_exits` (`id`, `employee_code`, `resignation_date`, `last_working_day`, `reason`, `clearance_status`, `fnf_status`).

2.9 Access Card Tracker & Office Facilities

- **Routes:** `/people/access-cards`, `/people/office-facilities`
- **What it Does:**
- **Access Cards:** Tracks physical RFID/NFC keycards, access levels (Server Room, Executive Floor, Main Turnstile), issuance date, and deactivation.
- **Office Facilities:** Enterprise ticketing for facility repairs, ergonomic equipment requests, monitor arms, and workspace adjustments.
- **Database Tables:** `access_cards`, `office_facility_requests`.

MODULE 3: RECRUIT (TALENT ACQUISITION & APPLICANT TRACKING)

3.1 Candidate Pipeline / Tracker

- **Route:** `/recruit` or `/recruit/candidates`
- **What it Does:** Visual recruitment pipeline managing applicants from source to hire.
- **Sections:** Kanban board columns: **Sourced → Screening → Technical Interview → Managerial Round → Offer Extended → Hired**.
- **Key Behavior:** Candidates dragged or marked as "Hired" or "Done" automatically graduate out of the active recruitment pipeline and flow into Onboarding/Employee Master Data.
- **Database Table:** `candidates`

- *Key Fields:* `id`, `name`, `email`, `role`, `department`, `stage`, `experience_years`, `expected_salary`, `rating`, `source`, `referred_by`.

3.2 Offer Letter Management

- **Route:** `/recruit/offers`
- **What it Does:** Drafts, approves, and dispatches legally binding employment offer letters.
- **Sections:**
- Candidate selector (dynamically combines open candidates and employees for internal transitions).
- Compensation package builder (Base Salary, Performance Bonus, Stock Options / ESOPs).
- Contract preview modal & release button.
- **Database Table:** `offer_letters` (`id`, `candidate_id`, `candidate_name`, `designation`, `department`, `annual_ctc`, `joining_date`, `status`).

3.3 Joining Formalities & BGV (Background Verification)

- **Route:** `/recruit/bgv`
- **What it Does:** Tracks external background check verification (Identity, Criminal record, Educational authenticity, Past employment verification) conducted by third-party BGV partners.
- **Sections:** Verification status badges (Pending, In Progress, Cleared, Discrepancy Found), vendor report download, and manual override review.
- **Database Table:** `bgv_records` (`id`, `candidate_id`, `candidate_name`, `verification_type`, `agency_name`, `status`, `completion_date`).

3.4 Onboarding Checklist

- **Route:** `/recruit/checklist`
- **What it Does:** Departmental operational checklist for new hires (e.g. Laptop configured, Slack account created, ID badge issued, Buddy assigned, 1-on-1 scheduled).
- **Key Resilience:** Ticking any task persists state in localStorage keyed by candidate ID (`brightcone_onboarding_checklist_${cid}`), preventing state loss on page refresh.

3.5 Open Positions & Peer Referrals

- **Route:** `/recruit/jobs`
- **What it Does:** Internal job board listing active engineering, product, and leadership openings. Employees submit peer referrals with CV uploads.
- **Key Feature:** The "Referred By" field dynamically binds to the authenticated user's persona (not a hardcoded name), attributing referral bonus tracking directly to the logged-in employee.

MODULE 4: PAYROLL (COMPENSATION & STATUTORY COMPLIANCE)

4.1 Run Payroll / Payroll Admin

- **Route:** `/payroll`
- **What it Does:** The central payroll processing control room.
- **Sections & Presentation Flow:**
- **Disbursement Summary Card:** Total payroll disbursement amount for the current cycle (e.g., ₹24.5 Lakhs), employee count, processing date, and payout status.
- **Live File Download Engine (Fully Functional):**
  - **Export CSV:** Downloads complete payroll register as a standard spreadsheet file (`payroll_register_2026.csv`).
  - **Download Slip:** Generates and downloads the individual employee text pay receipt.

    - **Download Audit Pack:** Generates an exhaustive CSV compliance audit bundle (`payroll_audit_pack_2026.csv`).
    - **Download Challan:** Downloads official statutory PF/ESI government deposit challan receipt (`statutory_challan_receipt_2026.txt`).
    - **Export Bank File:** Downloads the direct bank NEFT/RTGS batch transfer file (`bank_disbursement_batch_2026.csv`).
- **Database Table:** `payrolls` (`id`, `month`, `year`, `total_gross`, `total_deductions`, `total_net`, `status`, `disbursed_date`).

4.2 Monthly Payroll Processing & Register

- **Route:** `/payroll/register` (or `/payroll/monthly`)
- **What it Does:** Detailed line-by-line gross-to-net computation across every active employee.
- **Dynamic Communication:** Automatically loads live active employees from `/api/v1/employees` into the register, calculating:
- **Gross Pay:** Basic + HRA + Special Allowance.
- **Statutory Deductions:** Provident Fund (12% capped), ESI (0.75%), Professional Tax (PT), and Tax Deducted at Source (TDS).
- **Net Take-Home:** `Gross Pay - Total Deductions`.
- **Database Table:** `payslips` (`id`, `payroll_id`, `employee_code`, `basic`, `hra`, `allowances`, `pf_deduction`, `tax_deduction`, `net_salary`, `status`).

4.3 Payslip Records

- **Route:** `/payroll/payslips`
- **What it Does:** Historical repository of all disbursed payslips across fiscal quarters. Supports searching by employee code, filtering by month/year, and batch payslip generation.

4.4 Salary Structure & Revisions

- **Routes:** `/payroll/salary-structure`, `/payroll/salary-revisions`
- **What it Does:**
- **Salary Structure:** Configures CTC breakdown rules (Basic percentage, HRA, Provident fund employer contribution).
- **Salary Revisions:** Records appraisal-driven compensation increments, hike percentages, effective dates, and approval history.
- **Database Tables:** `salary_structures`, `salary_revisions`.

MODULE 5: EXPENSES (PEOPLE PLUS EXPENSE)

5.1 Submit Claim

- **Route:** `/expenses` or `/expenses/submit`
- **What it Does:** Enables staff to submit reimbursement claims for business travel, client meals, certifications, and hardware peripherals.
- **Modal Fields:** Category, Date of Expense, Amount, Currency (INR/USD), Purpose Description, and Receipt Attachment.
- **Database Table:** `claims` (`id`, `claim_number`, `employee_id`, `category`, `amount`, `receipt_url`, `status`, `submitted_date`).

5.2 Claims Approval Queue & Office Infrastructure Expenses

- **Route:** `/expenses/approvals`

- **Unified Operation:** The approval engine merges employee personal reimbursement claims and departmental office expenses into one unified managerial feed. Managers can **Approve**, **Reject**, or **Mark as Paid**.
- **Database Table:** `office_expenses` unified with `claims` via `GET /api/expenses`.

MODULE 6: SIGN (LEGAL CONTRACTS & HR COMPLIANCE)

6.1 Document Envelopes & Templates

- **Routes:** `/sign`, `/sign/envelopes`, `/sign/templates`
- **What it Does:** Electronic signature portal. Prepares and dispatches documents (NDAs, IP Assignment Agreements, Promotion Letters) for digital signature with audit logging.
- **Database Tables:** `sign_envelopes`, `signature_templates`.

6.2 Employee Handbook

- **Route:** `/sign/handbook`
- **What it Does:** Version-controlled corporate handbook repository (e.g. Version 4.0, 4.1).
- **Key Features:**
- Create new handbook versions with release summary and effective date.
- Archive obsolete versions or restore previous versions.
- Direct persistence to backend table `handbooks` with instant offline fallback.
- **Database Table:** `handbooks` (`id`, `handbook_id`, `title`, `version`, `effective_date`, `owner`, `changes_summary`, `status`).

6.3 HR Policies

- **Route:** `/sign/policies`
- **What it Does:** Corporate compliance policies (Leave & Time-off, Hybrid & Remote Work Framework, Prevention of Sexual Harassment - POSH, Information Security Standard).
- **Key Features:** Configure mandatory sign-off flags (`ackRequired`), policy categories, versioning, review schedules, and one-click CSV export.
- **Database Table:** `hr_policies` (`id`, `policy_id`, `name`, `category`, `version`, `effective_date`, `next_review_date`, `owner`, `ack_required`, `status`).

6.4 Policy Acknowledgements

- **Route:** `/sign/acknowledgements`
- **What it Does:** Audit compliance tracker verifying whether employees have read and signed mandatory policies.
- **Dynamic Employee Selection:** Selecting an employee from the dropdown dynamically pulls live personnel from `getEmployees()`, auto-filling their corporate email and department.
- **Database Table:** `policy_acknowledgements` (`id`, `ack_code`, `policy_id`, `policy_name`, `employee_name`, `employee_email`, `acknowledged_at`, `status`).

MODULE 7: CONNECT (INTERNAL ENGAGEMENT & COMMUNITY)

7.1 Company Wall & Social Posts

- **Route:** `/connect` or `/connect/posts`
- **What it Does:** Internal social feed for leadership announcements, team recognitions, project milestones, and peer kudos.
- **Database Table:** `connect_posts` (`id`, `author_id`, `author_name`, `content`, `likes_count`, `created_at`).

7.2 Events & Town Halls

- **Routes:** `/connect/events`, `/connect/townhalls`
- **What it Does:**
- **Town Halls:** Executive quarterly all-hands meetings. Supports scheduling, speaker line-ups, meeting links, recording links, and attendee counts.
- Fully backed by CRUD endpoints at `/api/v1/connect/townhalls`.
- **Database Table:** `connect_townhalls` (`id`, `title`, `date`, `time`, `speaker`, `speaker_role`, `location`, `status`, `attendees_count`, `recording_url`).

7.3 Celebrations (Birthdays & Anniversaries)

- **Route:** `/connect/celebrations`
- **What it Does:** Surfaces birthdays and work anniversaries occurring in the next 60 days, dynamically sourced from Employee Master Data.
- **Interactive Feature:** Clicking **"Wish"** opens an interactive congratulatory message. Once sent, the employee is immediately moved out of the pending list, and the wish is recorded in table `celebration_wishes`.
- **Database Table:** `celebration_wishes` (`id`, `employee_code`, `wished_by_code`, `wish_type`, `message`, `wished_at`).

7.4 Employee Directory & Direct Messaging

- **Route:** `/connect/directory`
- **What it Does:** Enterprise people search with live filters (Department, Office Location) and interactive organizational tree node view.
- **Direct Messaging:** Clicking an employee card opens their profile drawer. Typing a message and clicking **Deliver** sends a real-time notification to the recipient.
- **How to Check Messages:** The recipient (e.g. Rahul Varma) sees a badge on the **Notification Bell** 🔔 in the header; clicking it shows the delivered message with a link to Directory.

MODULE 8: LEARN (LEARNING MANAGEMENT & SKILLS DEVELOPMENT)

8.1 Course Catalogue & Assign Course

- **Route:** `/learn` or `/learn/courses`
- **What it Does:** Corporate LMS catalogue hosting compliance and technical modules (Cybersecurity, Generative AI, ISO 27001, POSH).
- **Assign Course Modal:** Allows managers to assign any course to **Everyone**, a specific **Department** (e.g. Engineering), or **Individual Employees** by multi-selecting from live employee cards.
- **Database Tables:** `courses`, `course_assignments` (`id`, `course_id`, `employee_id`, `employee_name`, `progress`, `status`, `due_date`).

8.2 Categories, Programmes, POSH, Security Training

- **Routes:** `/learn/categories`, `/learn/training`, `/learn/posh`, `/learn/security`
- **What it Does:** Categorized learning modules with color badges and course counters. New categories instantiate with 0 courses and update dynamically.

8.3 Skills Matrix & Completion Tracker

- **Routes:** `/learn/skills`, `/learn/completion`
- **What it Does:** Dynamic proficiency matrix tracking employee competencies across Engineering, Cloud, Leadership, and Product, backed by real employee records.

MODULE 9: SHIFTS & ATTENDANCE (WORKFORCE TIME MANAGEMENT)

9.1 Weekly Shift Roster

- **Route:** `/shifts/roster`
- **What it Does:** Visual grid displaying employee weekly shift assignments (GEN: General 09:00–18:00, MOR: Morning 06:00–15:00, EVE: Evening 14:00–23:00, NGT: Night 22:00–07:00).
- **Interaction:** Selecting any shift code updates the schedule in real time and persists across browser refreshes via `roster_assignments` / local storage cache.

9.2 Daily Attendance & Web Clocking

- **Route:** `/shifts/attendance`
- **What it Does:** Web punch-in / punch-out portal. Automatically calculates dynamic elapsed working hours between clock-in and clock-out.
- **Database Table:** `attendance_logs` (`id` , `employee_code` , `date` , `clock_in` , `clock_out` , `hours_worked` , `status`).

9.3 Leave Application & Leave Calculator

- **Route:** `/shifts/leave`
- **What it Does:**
- **Leave Calculator:** Computes day-by-day calendar breakdowns, automatically categorizing business days vs weekends/holidays to show chargeable leave days.
- **Leave Application:** Submits leave requests directly to `/api/v1/leave/apply` .
- **Approval Hierarchy Note:** In Brightcone HRMS, HR Admin reports directly to Founder & CEO Naresh Vemparala (L9). Therefore, HR leave requests route to Leadership/CEO, while general staff leave requests route to HR Ops.
- **Database Table:** `leave_requests` (`id` , `employee_id` , `leave_type_id` , `start_date` , `end_date` , `days_count` , `reason` , `status`).

9.4 Holiday Calendar

- **Route:** `/shifts/holidays`
- **What it Does:** Displays gazetted and optional company holidays. Fully supports both camelCase (`holidayDate`) and snake_case (`holiday_date`) payloads.
- **Database Table:** `holidays` (`id` , `name` , `holiday_date` , `holiday_type` , `description` , `is_optional`).

---

3. Database Schema Master Table Reference

Table Name	Primary Key	Key Business Columns	Description
`employees`	`id` (bigserial)	`employee_code`, `full_name`, `email`, `department`, `job_title`, `status`, `joined_date`, `manager_code`, `location`	Central employee records
`users`	`id` (bigserial)	`pid`, `name`, `email`, `password_hash`, `role`, `is_active`, `employee_code`	Authentication & credentials
`candidates`	`id` (bigserial)	`name`, `email`, `role`, `department`, `stage`, `experience_years`, `expected_salary`, `rating`, `referred_by`	Talent pipeline applicants
`offer_letters`	`id` (bigserial)	`candidate_id`, `candidate_name`, `designation`, `department`, `annual_ctc`, `joining_date`, `status`	Employment contracts
`bgv_records`	`id` (bigserial)	`candidate_id`, `candidate_name`, `verification_type`, `agency_name`, `status`	Background checks
`payrolls`	`id` (bigserial)	`month`, `year`, `total_gross`, `total_deductions`, `total_net`, `status`, `disbursed_date`	Monthly payroll runs
`payslips`	`id` (bigserial)	`payroll_id`, `employee_code`, `basic`, `hra`, `pf_deduction`, `tax_deduction`, `net_salary`	Disbursed pay receipts
`salary_structures`	`id` (bigserial)	`employee_code`, `ctc`, `basic`, `hra`, `special_allowance`, `pf_contribution`, `effective_from`	CTC component breakdown
`claims`	`id` (bigserial)	`claim_number`, `employee_id`, `category`, `amount`, `receipt_url`, `status`, `approved_by`	Expense reimbursements
`office_expenses`	`id` (bigserial)	`title`, `vendor`, `amount`, `category`, `status`, `approved_by`	Infrastructure expenses
`hr_policies`	`id` (bigserial)	`policy_id`, `name`, `category`, `version`, `effective_date`, `next_review_date`, `owner`, `ack_required`	Corporate policies
`handbooks`	`id` (bigserial)	`handbook_id`, `title`, `version`, `effective_date`, `owner`, `changes_summary`, `status`	Versioned handbooks
`policy_acknowledgements`	`id` (bigserial)	`ack_code`, `policy_id`, `policy_name`, `employee_name`, `employee_email`, `acknowledged_at`	Compliance sign-offs
`connect_townhalls`	`id` (bigserial)	`title`, `date`, `time`, `speaker`, `location`, `status`, `attendees_count`	All-hands meetings
`celebration_wishes`	`id` (bigserial)	`employee_code`, `wished_by_code`, `wish_type`, `message`, `wished_at`	Birthday & anniversary wishes
`courses`	`id` (text)	`title`, `course_type`, `duration`, `audience`, `due_date`, `total_assigned`	LMS learning courses

Table Name	Primary Key	Key Business Columns	Description
`course_assignments`	`id` (text)	`course_id`, `employee_id`, `employee_name`, `progress`, `status`, `due_date`	Course enrollments
`leave_requests`	`id` (bigserial)	`employee_id`, `leave_type_id`, `start_date`, `end_date`, `days_count`, `reason`, `status`	Leave applications
`attendance_logs`	`id` (bigserial)	`employee_code`, `date`, `clock_in`, `clock_out`, `hours_worked`, `status`	Web clock-in records
`holidays`	`id` (bigserial)	`name`, `holiday_date`, `holiday_type`, `description`, `is_optional`	Company calendar holidays
`roster_assignments`	`id` (bigserial)	`employee_code`, `shift_code`, `effective_date`, `assigned_by`	Weekly roster shifts

---

4. Live Demo Flow for Your Presentation (Suggested 5-Minute Script)

1. **Start on Executive Suite (`/`):**
2. *"Here is the Brightcone Enterprise HRMS cockpit. It gives leadership real-time visibility into headcount, active payroll, open requisitions, and attendance."*
3. **Move to People (`/people`):**
4. *"In Employee Master Data, all records reside in PostgreSQL. Notice Naresh Vemparala as Founder & CEO, Rahul Varma as HR Admin, and our engineering leads. Adding an employee immediately syncs across Payroll, Org Chart, and LMS."*
5. **Show Talent Acquisition (`/recruit`):**
6. *"Our recruitment pipeline manages candidates across stages. When an offer is generated in Offer Letters, the candidate dropdown pulls from our live candidate pipeline."*
7. **Demonstrate Payroll Processing (`/payroll`):**
8. *"The Payroll engine is completely live. Clicking 'Export CSV', 'Download Slip', 'Audit Pack', or 'Bank File' instantly generates real downloadable files. In Monthly Payroll, every active database employee is dynamically computed with PF, ESI, and TDS."*
9. **Show Expenses (`/expenses`):**
10. *"Office infrastructure claims and employee travel reimbursements are unified in a single approval queue."*
11. **Show Sign & Compliance (`/sign/policies` & `/sign/handbook`):**
12. *"Here we have versioned handbooks and corporate policies. In Policy Acknowledgements, employee selection dynamically binds to live personnel records."*
13. **Show Connect (`/connect/celebrations` & `/connect/directory`):**
14. *"Celebrations dynamically shows upcoming birthdays and anniversaries from Master Data; clicking 'Wish' updates the database and clears the card. In Directory, sending a message instantly alerts the user via the Notification Bell 🔔."*
15. **Show Learn (`/learn`):**
16. *"Our LMS allows assigning courses by department or individual employee without UI crashes. Real assignment records are written to PostgreSQL."*
17. **Show Shifts & Attendance (`/shifts/roster` & `/shifts/leave`):**
18. *"Our roster allows switching shifts with instant persistence. In Leave, our leave calculator breaks down business days versus weekends."*
